Community Press asked Phyllis why she wrote the book and why she believes people will want to read the book ...

There comes a time in your life when your hormones are raging, there's still dance in your step and laughter is the best grease for your gears. What better way to accentuate all three than some laugh out loud poetry to share with your gal pals.

Whether you're heading out for a night on the town or snuggling up with a blanket in bed, reaching for a book that's a quick read, a fast fix for what ails you is just the ticket to pick you up.

HOT And Bothered By It! is a humorous look at the light side of the mid-life chrysalis. It's all about rediscovering that rebel spirit, of learning to ask for what you deserve and realizing you have earned it. It's a wry commentary on the experiences of those who wish to benefit from age, moving toward the future while embracing the fun factor.

An "any woman's book," *HOT And Bothered By It!* is the perfect size for tucking into your purse and would be a great gift for any woman turning a special milestone birthday. This book, written by the 'Shel Silverstein' of the newly silvered (and beautician colored crowd), is a must read for all those baby boomers reaching the prime of their lives and loving it.
